

How To: Pressure Washer Pump Installation (308653006) and others.

- **All bolts need to be put into place before they can be tightened down.**
- **For some models - make sure the inlet and outlet tubes are facing the rear of the unit (handle side). Other models may vary.**
- **Most pumps are usually shipped ready to be installed (no oil needs to be added). Please check any and all documentation that arrives with the new pump to ensure proper installation.**
- **Please check with the manufacturer on your particular unit if you are having trouble with installation of the pump.**

**Note: Pressure washer pump 308653006 is a replacement pump for the 308653003 pump. The technical notes from the manufacturer state “Hoses will exit in a different location than the original pump output. The replacement pump will work but may mount in a different manner.”**
